

Quality, environment and safety policy

Barbarano Mossano, 29 October 2020

NASTEC SRL
Via della Tecnica, 8 / Tel. 0444 886289
36021 BARBARANO MOSSANO (VI)
P.IVA e Cod. Fisc. 03392100248

Nastec was established in 2007 with the exclusive aim of creating a range of pumps and accessories in which the combined knowledge of electronics, mechanics and hydraulics could give life to a new generation of products characterized by greater reliability, simplicity, flexibility and ease of use.

Goals

We offer quality products in the pump sector: our ambition is to grow as a partner of our customers and provide high quality solutions and services.

We consider creativity, quality, research, sustainability and respect for the local area to be non-negotiable and essential values for pursuing our vision of growth.

We believe in the concreteness of the trade, and we do it with an eye to the future, but with a wealth of experience.

We focus on the values of transparency and hospitality, opening the doors to our customers to find the best solutions together.

Instruments

Nastec Srl in order to achieve the objectives, it has decided to guarantee and give evidence, both inside and outside the Company, of compliance with the laws in force and to acquire and certify: Quality Management System (QMS) compliant with ISO 9001:2015 standard.

Management commitment

The company management undertakes to pursue the stated objectives by adopting the tools envisaged by the integrated management system and also undertakes to:

- Provide the necessary human and instrumental resources;
- Review the integrated policy for quality, the environment and safety, periodically verifying its relevance, application and need for revision;
- Disseminate the same policy to all Company personnel
- Make it available to interested Parties, upon request;
- Adopt and enforce all the fulfilments envisaged by the System;
- Reviewing the performance of the indicators, verifying the effectiveness of the Systems and the achievement of the defined objectives, promoting improvement actions and defining new period objectives, disseminating them within the company;
- Ensure compliance with current legislative provisions, authorizations and other applicable requirements, as well as periodic verification of compliance with these requirements;
- Prevent pollution and environmental impacts deriving from one's own activity, linked in particular to waste and emissions into the atmosphere and the elimination/reduction, where technically possible, of risks to the health and safety of workers, both corporate and third-party companies;

Company commitment

Our commitment is aimed at:

- experiment with innovative and unique technical solutions, studied together with our customers to make the systems more and more performing;
- check every single piece, with trained and scrupulous personnel, thanks to a research and development laboratory that experiments and controls with great skill,
- meet the requirements, needs and expectations of the market, of its collaborators, suppliers and all other stakeholders, to gain their full satisfaction, trust and loyalty and compliance obligations, mandatory or voluntary, applicable to our reality;
- continuously improve the company management system, quality, their processes and its performance, in every area;
- increase environmental performance and guarantee a safe, secure and clean environment, preventing injuries and occupational diseases to those who work for us and those close to us, preventing environmental pollution and limiting the impacts deriving from our activity, in particular relating to waste and emissions into the atmosphere, energy saving.
- manage production with a view to developing new technologies and methodologies associated with industry 4.0.

Periodically, as part of management reviews, we identify specific objectives (measurable, quantified and consistent with the commitments set out above) and the relative methods and responsibilities for achieving them.

Operation

The Quality Assurance and Management Manager (RQA) and the Safety and Environmental Management Manager (RSPP, RGA) have the task and the delegation to promote compliance with the provisions of this policy.

The Management asks all employees for the broadest collaboration to implement the Quality, Environment and Safety Systems and implement the contents of this Policy, the Integrated Quality and Environment Management Manual, the Procedures (P) and the Operating Instructions (I).
