

ADPRO

ADPRO it is an accessory for protecting analog and digital inputs from overvoltages using surge arresters. It is particularly suitable in the presence of long connection cables (> 20 m - 65 ft) or in installations subject to possible atmospheric discharges. The device also allows you to convert up to two 0-10 V analog signals into 4-20 mA analog signals.

General specifications

- Relative humidity of the operating environment:
5 - 95% non-condensing
- Workplace temperature:
from -20°C (-4°F) to 60°C (140°F)
- Protection rating: IP65 (NEMA 4)
- EMC compliance: EN61800-3 C2

Technical data

Rated voltage VDC	Cutoff voltage VDC	Discharge voltage to earth VDC	Maximum current for each input A	Weight Kg
0 - 15	28	90	1	0,6
